PROFESSIONAL SUMMARY

Self-driven AI Web Developer and former IT Support Analyst with practical experience in building real-time web platforms and intelligent automation tools. Proficient in Firebase AI Studio, Supabase, and Pabbly, with strong command of AI-powered development tools like Cursor AI, Google AI Studio, and Trae AI. Demonstrates expertise in full product development—from clean, scalable code and responsive UI/UX design to seamless API integration. Combines technical precision with a creative edge in graphic design to craft user-centric, visually compelling web applications.

WORK EXPERIENCE

Self-Employed • Remote | Dubai, UAE • 06/2023 - Present
AI & Digital Solutions Associate (Full Stack Developer) • Freelancer

- Designed and developed a responsive tourism web platform featuring interactive UI cards, wishlist, cart, and booking functionalities.
- Integrated **Pabbly's** WhatsApp API to automate user confirmations for bookings via WhatsApp.
- Built the frontend entirely using Firebase AI Studio with **Next.js**, and managed the backend using **Supabase** for authentication, data storage, and booking management—enabling end-to-end, AI-assisted development.
- The admin panel offers complete control through a user-friendly dashboard displaying total bookings, registered users, and their statuses, allowing the admin to monitor activity, update booking statuses, and manage destinations by editing or deleting details.
- Utilized AI tools like **Firebase AI Studio, ChatGPT, and Gemini** to accelerate development, streamline debugging, and assist in code generation.
- Built a clothing e-commerce website using **Shopify** with features like secure payments, cart, wishlist, and product variants. The site offers responsive design, easy navigation, and a smooth shopping experience.
- In addition to development, I handled branding and design work by creating all visual assets using Photoshop and AI tools — including logos, business cards, and UI visuals — to maintain a consistent marketing identity. I also built portfolio websites using AI technologies to meet the growing demand of individuals seeking a professional online presence.
- Tools used : **Firebase AI Studio, Next.js, Supabase, Pabbly (WhatsApp API), Cursor AI, ChatGPT, Gemini, Git, Photoshop, Webhooks, Shopify (Liquid Templates, Themes, Plugins).**

EDUCATION

Master Of Computer Applications

Mar Thoma Institute of Information Technology, Ayur.

07/2022 – 09/2024

University of Kerala

76%

B.Sc. Computer Science

University Institute of Technology, Yeroor

06/2017 – 06/2020

University of Kerala

SKILLS

PROGRAMMING

LANGUAGES AND OTHERS:

Python, SQL, HTML, CSS, React, SEO, SDLC, Shopify, Machine Learning, AI & Chatbot Technologies, LLM Prompt Crafting, Data Science, Data Modeling, Cloud Computing, Power BI, Data Cleaning & Transformation

FRAMEWORKS & LIBRARIES:

Pygame, Tkinter, NumPy, Scikit-Learn, TensorFlow, Pandas

LANGUAGES:

*Malayalam – Native ,
English – Proficient ,
Hindi – Advanced ,
Tamil – Basic*

MICROTECH Institute of Computer Technology, Punalur, India. 08/2020 - 08/2022

IT SUPPORT Analyst · Full-time

- Assist users in troubleshooting and resolving technical issues related to login access, file recovery, software crashes, and other technology-related challenges, ensuring minimal disruption to their workflow.
- Identify and resolve data inconsistencies, missing records, or system errors by querying the database.
- Developed expertise in creating reports to support IT functions.
- Gained experience using data analysis tools to support IT troubleshooting and system optimization.

PROJECTS

HR Analytics Dashboard · 11/2024 – 03/2025

- Designed and developed a fully interactive HR Analytics Dashboard to visualize and analyze key human resource metrics, providing insights into attrition, employee demographics, and workforce structure.
- Tracked and visualized employee records with real-time KPIs such as Attrition Count and Rate, Average Age, Salary, and Tenure.
- Built visuals like Donut Chart for Attrition by Education Field, Bar Charts for Attrition by Age, Salary Slab, and Job Role, Line Graph for Attrition by Years at Company, Gender Filter, and Department slicers, Implemented DAX measures for calculating attrition rate, average salary, and other key indicators.
- Tools Used: Power BI, Excel, Data Modeling.

Two Player Games · 04/2024 – 09/2024

- Two-Player Games is an interactive and dynamic collection of classic two-player games implemented in the Python programming language. The primary aim is to provide users with an engaging and enjoyable gaming experience while demonstrating the versatility and power of Python in game development. The games feature a user-friendly interface designed to appeal to players of all ages and skill levels.
- Using Python(Pygame Library).

VOLUNTEERING & LEADERSHIP

National Service Scheme volunteer · 06/2015 – 03/2017

Organized and various community outreach and development initiatives, including health camps, environmental drives, and vocational training workshops.

DATABASE MANAGEMENT:

Supabase, MYSQL

TOOLS: *Eclipse, Visual Studio Code, PyCharm, MS Office, Photoshop*

PLATFORMS:

Firebase AI Studio, Supabase, Cursor AI, Trae AI, Google AI Studio, Pabbly, Cloud platforms, Lovable, Webhook, Vercel, GitHub, Shopify

SOFT SKILLS:

Self-management, Problem Solving, Teamwork, Learning New Skills
